

Cloud Technical Services

Make Oracle Cloud Work for Your Business

Your proven On-Premise Implementation Partner, Elire Inc., has made the move to Cloud! Our Success Delivered™ Cloud Implementation Methodology offers Rapid Implementation, Data Conversion, Application Integration, and Application Enhancement to make your transition to the cloud as seamless and stress-free as possible. As your Trusted Advisor, Elire's Technical Team works with you to achieve a smoother implementation, a Cloud Solution that better meets your business requirements, and higher satisfaction with your Production System.

Elire Cloud Technical Service Offerings

Data Conversion

- ✓ Leverage proprietary pre-defined templates for rapid, accurate conversion
- ✓ Utilize Elire's PeopleSoft Legacy Data Conversion Extractor
- ✓ Enhance system capabilities by converting historical data

Advanced Reporting

- ✓ Develop executive and operational dashboards that provide actionable information at a glance
- ✓ Create complex reports where requirements can not be met with drag-and-drop
- ✓ Leverage data visualization tools to enhance workforce analytics

Application Testing

- ✓ Develop strategic approach for testing of business processes after monthly patches and new releases
- ✓ Reduce time and cost for testing of business processes after monthly patches and new releases by leveraging automated testing tools

Application Integration

- ✓ Create interfaces to and from third party systems
- ✓ Leverage delivered Oracle Cloud APIs to streamline and modernize integrations
- ✓ Use orchestrations to integrate external data into business processes

Application Enhancement

- ✓ Add workflow, approvals, notifications, and additional business rules to delivered business processes
- ✓ Leverage Personalization to add additional pages to the Oracle Cloud application or additional information to delivered pages
- ✓ Leverage PaaS and Visual Builder to create bolt-on enhancements that are seamless and upgrade-safe
- ✓ Develop mobile applications for platform access on-demand

Security

- ✓ Integrate Oracle Cloud into your application ecosystem with federated Single Sign-on
- ✓ Design Security architecture and implementation
- ✓ Strengthen compliance with enhanced SOX auditing reporting
