AP Automation

Elire's Accounts Payable (AP) Automation Services empower your organization to define requirements for the end-to-end invoice management process, including invoice intake, coding, workflow approval, voucher creation, reporting and dashboards. By leveraging AP Automation software, the Elire team can develop a standardized process across the organization, for exceptional efficiency gains, fast processing, and improved collaboration. This includes improving the process all the way to payments.

Are You?

- Spending too much time entering data and not enough time analyzing it
- Lacking visibility in the end-to-end process from receiving to paying invoices
- Incurring late fees or missing out on early pay because you don't process and/or approve invoices fast enough
- Operating with separate, unintegrated systems for imaging of invoices
