# Cloud Readiness Scorecard

Whether you move in six months or six years – you need a plan to prepare your organization for your future move to the Cloud. Assessing your current process, people, and system maturity will allow for a holistic view of your organization’s cloud readiness – as well as illuminate iterative improvements that can be made to better prepare your organization.

## Common roadblocks and pain points during On-Premise to Cloud transformations can often be avoided with appropriate planning for:

- Motivation
- Governance
- Resource Planning
- Change Management
- Deployment Strategy
- Business Process Mapping
- Technical Architecture
- Data Conversions
- Reporting
- Security
- Customization Analysis

The Elire Cloud Readiness Scorecard will evaluate your organization’s current application and personnel strengths and opportunities to refine your strategies ahead of cloud migration – saving you time, money, and frustration in the process.

## Cloud Readiness Scorecard Overview

CLOUD READINESS ASSESSMENT	
MOTIVATION	TECHNICAL ARCHITECTURE
GOVERNANCE	DATA CONVERSION
RESOURCE PLANNING	REPORTING
CHANGE MANAGEMENT	SECURITY
DEPLOYMENT STRATEGY	CUSTOMIZATION ANALYSIS
BUSINESS PROCESS MAPPING	INITIATION INFRASTRUCTURE

Elire’s PeopleSoft, Cloud, and Advisory Experts will sit down with your key stakeholders and a set of detailed questions across 11 categories to gauge your People, Process, and System maturity at a high level for analysis. These questions are intended to illustrate what areas of your cloud roadmap have current plans and what areas need additional support ahead of beginning a transformation. For those already starting an implementation – this analysis can help mitigate potential roadblocks ahead of becoming an issue.

## Cloud Readiness Scorecard

Whether you move in six months or six years – you need a plan to prepare your organization for your future move to the Cloud. Assessing your current process, people, and system maturity will allow for a holistic view of your organization's cloud readiness – as well as illuminate iterative improvements that can be made to better prepare your organization.

### The Cloud Readiness Scorecard is executed in three phases:

- **Data Gathering** – with your key stakeholders and Elire's transformation leads
- **Analysis** – Elire experts analyze the details and requirements gathered during the initial session and map against best practice maturity requirements for transformation success
- **Data Review and Recommendations** – presenting recommendations with initiatives and priority to support your application roadmap ahead of cloud transformation
  - Deliverables include the scorecard with data insights, recommendations for improving maturity across different categories, and high-level priority recommendations for next steps

### Why Elire?
