

Elire Strategic Advisory Services:
Process Tools Training

Elire will teach your team basic process improvement tools to initiate or sustain process improvement efforts within your organization.

Every organization is different and so are the solutions to your problems. That is why Elire teaches our proven **tools based** process improvement methodology to provide your team the skills to solve any problem.

HOW ELIRE CAN HELP

4 Days of classroom led training with up to **12** participants will learn a flexible framework that will allow them to take on virtually any process improvement initiative, big or small.

5 Phases of Process Improvement

Mobilization will help you gain alignment and have productive sessions

Current State Assessment allows you to efficiently document and tie metrics to how the work is done today

Leading Practices provides the tools to conduct research so you can develop a complete solution

Vision & Strategy is the phase in which participants develop solutions and a structured business case

Designing the Future State brings together the information from all the phases to create the blueprints to execute their vision

Throughout the 5 phases, participants will go through workshops that allow them to practice the tools in breakout sessions with their peers.
