## Big changes are coming for your revenue - have you made the necessary adjustments?

Oracle Revenue Management Cloud Service (RMCS) can help ensure your company is compliant to the new ASC 605, 606, and IFRS 15 standards with the ability to perform iterative modeling of the standard during implementation, along with providing real-time insight, reducing delays throughout performance obligations lifecycle. RMCS provides stakeholders with assurance by properly recording customer sales contract transactions to General Ledger, as well as providing an end-to-end revenue recognition process which can be integrated with your existing ERP and third party sales data systems.

### Elire Differentiators

Over 20 years of Financial Reporting Expertise across a wide variety of industries
